

Excel Voice Services SM

CONNECTING YOU WITH THE RIGHT SOLUTION

Excel Switched and Dedicated Voice services allow you to communicate with anyone across the U.S. and around the world at the touch of a button. The Excel wide-reaching voice network proves its reliability to millions of users in North America every day. Our offering of both switched and dedicated service gives our customers the ability to choose an access method that best suits their needs.

Excel Switched Access

Excel Switched Access gives your company access to the Excel network through your local provider. It offers low domestic and international pricing and allows your company to easily understand the savings benefits by making your monthly bill easy to read. For smaller volumes of monthly traffic, this service provides a reliable, cost-effective solution for both domestic and international calls.

Excel Switched Access Features

Flat Rate Pricing — Excel offers highly competitive domestic and international rates to the world's top business destinations, regardless of the time at which calls are made.

Account Codes — Tracking calls by employee, department, or project helps business owners to control and analyze telecommunications expenses each month.

Unsurpassed Customer Service —

With 24/7 customer service, Excel will answer your call within seconds. Your company will also be assigned a personal support representative who is specifically designated to serve your business and understand your personal communication needs.

Rapid Implementation — Excel Switched Voice customers are usually active in less than ten business days.

Choice of Billing — Billing is available in paper or electronic format.

Detailed Available Management

Reports — Excel provides summaries of voice traffic by interstate, intrastate, and international termination. Additional management reports are also available.

Automated Bill Payment — With our “Bill Matrix” option you can make payments directly over the phone or online using your credit or debit cards. And, you get to keep your rewards.

Excel Dedicated Access

Excel Dedicated Access gives businesses access to the power and reach of the Excel network through dedicated high-capacity links. Excel Dedicated Access provides a link to the nearest Excel Point of Presence (POP). Our compatibility with most major PBXs makes us one of the most viable options for high-bandwidth global communication needs.

The features offered to Switched Voice customers are also available to customers with Dedicated Service. In addition, Dedicated Access customers can take advantage of:

Local Access Management — Excel coordinates the installation of local access from its network to the customer premises by leveraging its strong relationships with local providers.

Competitive Industry Rates — Aggressive rates offered by Excel enable companies to maximize the value of their telecommunications expenditures.

Exceptional Reliability — All of Excel's services, including Excel Dedicated Access, are based on the strength and reach of its high-capacity network.

ISDN — Service offers dedicated PRI access from the customer premises directly to the nearest Excel's Point of Presence. We provide customers with a number of advanced capabilities that allow users to effectively manage calls with features like Calling Party Number identification, Call-by-Call selection and Calling Number Delivery.

About Excel Telecommunications

Excel is a leading provider of long distance, wireless and data services to businesses, resellers and telecommunications dealers worldwide. With strong financial backing and a mission to become the world's largest independent provider of wholesale voice services, Excel is developing the business relationships and strategic alliances it takes to help enable its channel partners to become more profitable in the voice services market.

Comtel Telecom Assets LP, owners of Excel, completed the purchase of substantially all the assets of the assets of VarTec Telecom and its sub-brands, VarTec Solutions, OneChoice and Excel in June 2006.
